PROJECTS

Faux - Ai powered deepfake detector
AI & ML · Flask · TensorFlow · OpenCV · NumPy

- A Chrome extension that quickly detects deepfakes in images and videos across websites, offering real-time media analysis.
- Adds a detect button over each image or video, providing instant authenticity results in the extension's popup for easy content verification.
- Currently under development, with the potential to transform how we interact with and trust online media by continuously improving detection accuracy and adding new features.

Nova Dash - Vertical space shooter game
Next.js · TypeScript · GSAP · p5.js · Tailwind CSS

- A retro-style space shooter game to be featured at Excel 2024, the tech fest of Govt. Model Engineering College, with fast-paced action, smooth animations, and a competitive leaderboard for participants.
- Currently under development, aiming to deliver an immersive arcade experience with exciting gameplay and seamless performance.

Swift Summarizer - Ai powered article summarizer
JavaScript · React.js · Redux Toolkit · Tailwind CSS

- An AI-powered tool that generates concise, accurate summaries of articles with just a URL input.
- Delivers instant, easy-to-understand insights, helping users save time and quickly grasp key points.

Evnt - A tool to simplify telegram group setup
Next.js · TypeScript · Node.js · Tailwind CSS

- An open-source tool that automates group creation and participant management using Telegram's MTProto API.
- Organizers can upload participant data via CSV, automatically adding them to the relevant Telegram groups, simplifying the process.
- Designed for scalability and efficiency, ensuring secure, seamless integration to manage large groups and real-time updates effortlessly.
